General Description of Your Program	In Puerto Rico as in other countries there is a decline of health care professionals choosing to work in primary, dental and mental health care fields in communities where they are most needed.
Activities undertaken by Students/Residents in Program	Serve 160 hours or four weeks rotation in a community health centers that exposes them to multidisciplinary teamwork, under the direction of a preceptor in their health area. Help them identify mentor. Receive information on NHSC, Community Health Center (330), administer a pre and post test in cultural competence and Multidisciplinary health care team and managed care. Students and Residents will also be exposed to Health Information Technology.
List of Sites Students can/will be rotating through	Nineteen 19 community based primary care sites and other nineteen extension centers.
